we’re the business behind doors
Since 1994, Independent Doors has been providing high quality, high performance, standard and custom interior and exterior doors and sliders for the residential and commercial construction markets.

Widely recognised among architects, contractors, designers, builders and professionals in the building industry, Independent Doors Ltd has earned a reputation for excellence in its field, taking pride in providing certified superior products at reasonable prices.

Today’s customers demand quality, flexibility and dependability. Independent Doors prides itself on delivering – no matter how technical the specification or custom your order.

We are proud to count some of the South Island’s premier properties among our recent projects, but it is also the satisfaction of diligently being able to service the needs of our smaller customers and provide them with the special attention they deserve that gets us out of bed in the morning.

Whatever your project – from 4 doors to 40 doors – you’ll receive quality products and service from our team of specialists. It’s what makes us a favourite from commercial developers and builders right through to the DIY renovator.

We are located in three handy locations throughout Canterbury and Central Otago – Christchurch, Timaru and Cromwell. Speak with one of our local representatives to see how Independent Doors can make your door sourcing experience a less stressful one. Leave it up to the professionals.

**NEW ZEALAND NATIVE DOORS**

Independent Doors can craft the perfect timber door for you. Some of our handy work graces some of the more prestigious properties in the South Island.

With a variety of natural timbers to select from, you can be assured of individually crafted, high quality products that leave you with the ability to stamp your own mark. Leave it stripped back to the way nature intended it, or use stain or paint to create a warm and inviting environment.

Use a wooden door to accentuate your design, or merely work with it. They are versatile in design, yet robust and made to last.

A natural thermal insulator, timber provides the perfect material to maintain warmth in winter, and remain cool in summer, all while maintaining resistance against the elements of nature.

**ALL DOORS ARE AVAILABLE IN HOLLOWCORE, SOLIDCORE, POLYSTYRENE CORE. ALL DOORS ARE AVAILABLE UP TO 2700MM HIGH. OTHER VENEER OPTIONS ARE AVAILABLE ON REQUEST.**

**EXOTIC SPECIES DOORS**

**INTERIOR & EXTERIOR DOORS**
**New Yorker Doors**

**CS NewYorker®**
A stylish pre-finished aluminium framed door that can be glazed using a wide range of materials – usually glass. The CS NewYorker frame may be pre-finished in a choice of colours - anodised or powder coated.

**CS AluTec®**
A premium flush aluminium door with no visible screws or fastenings. It has been designed to reduce the risk of bowed doors and is ideal as an oversized door or large room divider due to its stability.

- Bi-Parting cavity with natural anodised 4-lite CS NewYorkers
- Bi-Parting Full height CS AluTec doors
- Full height surface slider with CS AluTec door
- CS TimberFormed cavity slider with CS AluTec door
Bifold doors are used to separate rooms and provide access to wardrobes and pantries. They add a touch of history, sophistication and pure functionality.

With a variety of configurations, or a custom configuration made to order, the bifold door is usually constructed in pairs with two doors folding to one side, or two with four doors split in the centre of the opening, with two doors folding back to each side.

Whether it be a simple design or something more elaborate, Independent Doors can deliver the bifold door right for you. IN MULTIPLES OF TWO.

Independent Doors Wardrobes

350 SERIES SLIDING DOORS
The 350 Series Architectural Wardrobe Door System has been designed to meet future design trends in the home or apartment. Top hung or bottom mounted on tracks and custom made in a wide variety of powder-coat or anodised colours, the 350 Series versatility allows architects to achieve everything from simple minimalist doors to heavily structured panel designs.

Max Height: 2700mm
Max Panel Width: 1200mm
Panel Options: Double
Bottom Rolling: 2, 3 or 4
Mid Rail Option: 30mm or 50mm
Infill Mirror, Gib, Melteca, Seratone
All other colours custom-made to order.

4200 SERIES SLIDING DOORS
The 4200 Series is a modern, compact, bottom rolling wardrobe and internal door system designed to maximise access to storage space especially where triple door applications are preferred. Melteca or Seratone infill can be combined with mid rails to produce modern, attractive door panels. Traditional infill such as painted gib-board or safety mirror can be used to blend with room décor. Door frames can be custom-made in a variety of powder-coat or anodised colours.

Max Height: 2400mm
Max Panel Width: 1200mm
Panel Options: Two, Three or Four
Mid Rail Option: 30mm
Infill Mirror, Gib, Melteca, Seratone
Colours: Standard Colour Selection: Off White, Powder-Coated Pearl White, Anodised Satin Silver. All other colours custom-made to order.

Top Fix Wardrobes

CS Wardrobe Sliders incorporate the same high-quality track and carriage system used in CS Cavity Sliders, ensuring they are smooth, quiet and extremely reliable. Standard 38mm thick timber doors can be used, ensuring hinged and wardrobe doors match.

They also have another major advantage - NO unsightly and annoying floor tracks to trip over or to attract dust and dirt. Instead, a tiny floor guide is hidden in the door overlap. In partnership with the top-hung track and carriages, it ensures the doors will never ‘de-rail.’

Independent Doors
Timber Doors

Independent Doors can craft the perfect timber door for you. Some of our handy work graces some of the more prestigious properties in the South Island.

With a variety of natural timbers to select from, you can be assured of individually crafted, high quality products that leave you with the ability to stamp your own mark. Leave it stripped back to the way nature intended it, or use stain or paint to create a warm and inviting environment.

Use a wooden door to accentuate your design, or merely work with it. They are versatile in design, yet robust and made to last.

A natural thermal insulator, timber provides the perfect material to maintain warmth in winter, and remain cool in summer, all while maintaining resistance against the elements of nature.
Like our timber doors, Independent Doors can craft the perfect timber window from a variety of timber types to add texture, character and colour to your build.

Individually crafted and quality guaranteed, the wooden window range is a great way to add character, sophistication and a homely feel to your development.

With the natural benefits of wood, this material is breathable, meaning that in the warmer months your timber windows will help keep the room cool, while in the colder months, its heat resistant properties are activated, effectively insulating the window and keeping heat where it should be – inside.

If it’s a beautiful, solid and practical solution you need for your window treatments, the timber window could be just the solution.

- **VP OPTIONS**
  - Timber or aluminium beads
  - Georgian wire glass up to 650 x 600mm
  - Robax glass up to 800 x 500mm or maximum of 0.4m² (standard dulck range)
  - Pyrobel 16mm up to 800 x 500mm (fully insulated to 30mins)

- **FRAME OPTIONS**
  - PQ FJ pine timber frame 30mm thick (up to FRR - / 30 / 30)
  - PQ hardwood timber frame 30mm thick (up to FRR - / 60 / 30)
  - Steel frame 38mm thick - (up to FRR - / 240 / 30)
  - All timber frames available as architrave or grooved for gib
  - Steel frames available as one or two part, powder coated, galvanised or stainless finish

- **SMOKE & FIRE RATED DOOR SETS**
  We offer an extensive range of smoke and fire rated door sets with over 500 approvals to strict Australian and New Zealand standards. From applications requiring 30 minute doors (HFD30), through to 240 minute doors (HFD240), Independent Doors fire doors with their highly specialised non-combustible core, give you assurance and peace of mind.

- **ACOUSTIC RATED DOOR SETS**
  Independent Doors offer a range of acoustic door sets ranging from STC 30 up to STC 48 for interconnecting hotel doors. Ratings are subject to the type of wall and accuracy of installation. For fire acoustic doors, the fire approval limitations on design and hardware apply.
Independent Doors
Hallmark Performance Doors

**DOOR & HARDWARE OPTIONS**

Independent Doors fire doors can be supplied in a huge range of approved options, including: door types, vision panels, glazing, facings, lock plates and hardware.

All performance doors are supplied prehung as a door set comprising the frame, hinges, seals and vision panels all factory fitted. Regardless of your application, Independent Doors can supply approved rated doors to rigid specifications and quality standards.

**DOOR CLOSERS**

Fire doors require an approved self closing device i.e. a door closer. Door closers must be subject to a fire test and approved. Independent Doors can supply all your hardware needs.

**MORTISE LOCKS**

Mortise locks are the most common door lock fitted to fire doors. Independent Doors has all of the approved major brands and types available.

**FURNITURE & ACCESSORIES**

A wide range of furniture and speciality hardware is available – electronic locks, electric strikes, panic exit devices, eye viewer’s, double action pivots, smoke seals, drop seals etc.

---

**INTERIOR DOORS**

Plantation solid interior doors are made with a pine, engineered construction. While the LVL core gives strength, preventing movement and bowing, the mdf finish and panels provide a smooth paint finish. Solid feature doors add value. Interior doors get a lot of traffic, especially bedroom and bathroom doors and these doors are stronger than hollow core doors.

- Pine, engineered construction
- Widths 460, 610, 710, 760, 810
- Height 1980 – 2100mm
- Can be cut down to 1980 by Plantation
- 38mm thick
- Pre-primed
- Square shoulders - bead options, such as Villa available
Round knobs make a great design statement and can be extremely aesthetically pleasing to the eye.

The benefit of a knob door handle is that there are usually available matching knobs of smaller dimensions that can be used for fitting to cupboards and wardrobe doors. This assists with allowing for a consistency within your decorating and design ideas.

A disadvantage of "knob" furniture when installed close to a door edge is that it can cause the knuckles of one’s hand to hit against the door jamb/frame causing injury (and annoyance). A problem of turning the knob can develop if the latch mechanism is not properly matched to the knob. Subsequently the multiple operating springs can sometimes be hard to turn against. Poor installation if round knobs can also add to this difficulty.

It is extremely important that purchasers take care in selecting the correct latch mechanism and if in doubt ask for our assistance before making this choice.

Lever designs are numerous and have aesthetic qualities. There is a large variety to choose from which allows you to add levers as a support to your design, or alternatively as a statement piece on your doors.

An advantage of the lever over the round knob is that the design places your hand well away from the edge of the door. This is useful in the case of narrow door styles (often found in sets of French doors) which do not allow a large installation back-set from the door edge.

Another advantage of the lever is that people suffering from arthritis are able to get more leverage and do not need to grab the handle as you do with "knob furniture" in order to access the door.

One disadvantage of the lever is that you can inadvertently get the lever caught on your sleeve or loose clothing, leaving you tangled with the door – a large risk if you are carrying something or moving at speed.
INTERIOR DOORS

Doors must not be stored or hung in damp or freshly plastered areas.
Doors must be stored flat prior to hanging
All doors must be inspected upon delivery and Independent Doors Ltd must be advised of any defect within 24 hours of delivery. If the door is installed it is deemed accepted by the customer.

Cavity Sliders: We take all reasonable avenues to ensure cavity slider doors & jambs stay as straight as possible but as temperatures vary inside the house throughout the build process we MUST advise that movement in the door panel is experienced which is out of our control. Independent Doors Ltd will not replace a bowed cavity slider door within 12 months of delivery, giving the door 4 seasons to acclimatise to its environment. We strongly recommend the inclusion of steel stiffeners to all Cavity Slider doors, this is an optional extra, Independent Doors Ltd will not replace at its cost bowed cavity slider doors that have not been fitted with steel stiffeners.

Natural variations in colour, texture or grain of Veneer or associated materials may occur, this is normal and will not be considered a defect. It is our recommendation that paint grade doors not be clashed. Show through of clashing strips on paint grade doors is normal and will not be considered a defect. It is recommended that a low sheen or semi-gloss paint be used to minimise this possibility in 3mm, 4mm & 4.75mm skin doors and if a high gloss finish is to be achieved we would recommend to use a door with a minimum of 6mm skins.

Show through of scratching on paint grade doors is normal and will not be considered a defect. It is our recommendation that paint grade doors not be clashed.

Natural variations in colour, texture or grain of Veneer or Timber will not be considered a defect.

Both faces and all four edges of the door must be sealed and painted using a quality paint, applied strictly in accordance with the manufacturers’ recommendations. It is recommended exterior doors be painted in a light reflective colour. IDL recommend using Resene “Cool Colours” for dark tones to minimise timber shrinkage, warping & twisting. Doors painted in dark colours or that are NOT properly sealed all 6 edges upon taking delivery void any warranty against the above.

Doors exceeding 2400mm in height or 1200mm width are subject to very limited or no guarantee and are manufactured at clients own risk.

PAINTING

U.V primer is suitable for water based and solvent based paints and is very simple to prepare for additional coats. Provided the door has not been damaged since it left Hallmark, all that is required is a thorough clean of the door using a tack cloth. If any light sanding is required, a sanding pad no courser than 400g may be used. Sandpaper courser than 400g may cause the primer to be scratched, exposing the raw MDF underneath. It is very important to prevent any scratching of the U.V primer – especially when using a water based undercoat. If any scratching has occurred these must be completely filled, sealed off and then sanded flat. Water based paints will cause swelling of the MDF substrate if allowed to seep into exposed scratches. To get the best door finish, Hallmark Group recommends using a solvent based undercoat as this will greatly reduce the risk of any potential fibre raise should there be any exposed MDF/scratches within the face of your door.

EXTERIOR DOORS AND JOINERY

Exterior flush panel doors must not be used in unprotected areas and are not suitable for use as Fire Doors, in saunas, steam rooms and the like. Doors subject to abuse or installed in an inappropriate manner or position will be excluded from any warranty. If a exterior door is to be used in an exposed situation we recommend a Zincalume steel clad door or the likes.

Please note, that timber being a natural product, will vary in colour and grain. Unfortunately, we cannot guarantee colour matching. Also, being a softwood, slight dents can be found on the finished surfaces from general handling.

Doors exceeding 2400mm in height or 1200mm width are subject to very limited or no guarantee and are manufactured at clients own risk.

Doors with different veneer species to each face and doors not treated in the same way on both faces will be excluded from warranty.

We strongly recommend against staining, blanding and the use of linseed oil on veneered doors. The use of such products is carried out entirely at the owners risk and invalidates any warranty.

Doors must be hung on a minimum of 3 hinges.

Doors exceeding 2400mm in height or 1200mm width are subject to very limited or no guarantee and are manufactured at clients own risk.

Doors with different veneer species to each face and doors not treated in the same way on both faces will be excluded from warranty.

We strongly recommend against staining, blanding and the use of linseed oil on veneered doors. The use of such products is carried out entirely at the owners risk and invalidates any warranty.

Doors must be hung on a minimum of 3 hinges.

Tolerances

+ or – 1.5mm for length, width or thickness
+ or – 3.0mm for squareness (maximum difference between diagonals)
+ or – 5mm for bowing or twisting

By accepting delivery of doors the purchaser agrees to accept our terms and conditions of sale as detailed in our terms and conditions of sale, copies of which are available on request or on our website iddoors.co.nz

ALL PAYMENTS ARE DUE AT THE TIME OF DELIVERY OR INSTALLATION, UNLESS YOU ARE AN ACCOUNT CUSTOMER.

The product you are now ordering will be custom made for your purpose. No returns will be accepted unless prior arrangements are made with management. Please note that all non-standard product will not be able to be returned or cancelled once made. If you are a CASH SALE customer a deposit of 50% is required prior to job procedure with the balance payable prior to dispatch.

All products remain the property of Independent Doors LTD until paid in full.
