Hallmark Cavity Sliders

INTRODUCING HALLMARK PREMIUM CAVITY SLIDERS

Hallmark Group had a goal to introduce a cavity slider into the market with four key factors in mind. To be manufactured with the highest quality components, be easy to use and install, be uncomplicated and most of all, be affordable. We have achieved this with the latest addition to our range. Through years of experience, extensive research, development and testing, we introduce Hallmark premium cavity sliders.

Hallmark cavity sliders are all about creating more useable space. An excellent option where space is at a premium, saving almost 1m² of floor area needed for an average swinging door.

Cavity sliders offer versatility to create the space you need, making the area more efficient and functional. Close the door for privacy, warmth, charm and quietness, or hide the door to create spaciousness, view, openness and light. The doors simply disappear inside the wall leaving the floors and walls free. This gives you more space for furniture, artwork, appliances and shelving.

Single cavity sliders are ideal for small space constrained places, while larger double door units enable you to open up adjacent rooms to blend spaces together. Space has become more valuable than ever before and cavity sliders are a great way of adding space to your home or office.

Our products are manufactured to the highest standards and we are continually innovating with the latest technology to deliver the best solutions. Whether it be for the healthcare, education, accommodation, commercial or residential markets, Hallmark sets the benchmark in quality for New Zealand's door industry.

OUR PROMISE TO YOU

All Hallmark cavity sliders are produced from start to finish in a precision factory environment. Unlike other cavity slider manufacturers, we produce all our own timber components in our factory, giving us complete control and flexibility over the entire process. Our rollers, aluminium components and soft close system have been engineered to our specifications and have passed extensive cycle testing.

To maintain the Hallmark service and quality, we have a fully independent manufacturing facility set up for the production of cavity slider units. This allows the stocking of standard size units so we can ship to our customers on a daily basis.

At Hallmark we're all about the customer experience. We're focused on giving our customers a seamless and stress-free experience from the quoting stage right through to after sales service. Should there ever be an issue, we don't stuff around pointing the finger, we just get in and make it right.

FEATURES & BENEFITS

State-of-the-art head track

- › Guided track system. Doors perfectly centred every time – particularly critical for double doors.
- › Tapered design to prevent build-up of dust over time. This ensures your door will roll smoothly for years.
- › Especially designed for strength and longevity.

The ultimate in running gear

- › Eight wheels per door! 2x 4 wheel hangers per door spreads the load and makes your door easy to open and close.
- › 29mm diameter wheels. Your door will run smoothly and quietly.
- › 80kg and 120kg options available.

80kg

120kg

Our quick release!

- › Simple but VERY effective. Easy to use, quick to install or remove door, and NOT OVER-ENGINEERED! You won't be paying for stuff you don't need.

Extra adjustment

- › Things slightly out of square? Hallmark's patented floor guide system will help you out – you can adjust the guide left or right to suit.
- › Likewise, our brackets; when fixing these to the top of the door you've got adjustment forward, back and side to side. Handy if you get a door with a slight bow in it.
- › All units supplied with a spanner for adjustment.

Our soft close

- › Smooth, reliable, tested and proven. It's built to last and will protect your cavity slider and walls from unnecessary wear for years.

Even more benefits

- › NZ made and owned.
- › Standard sizes ex stock.
- › Chunky aluminium extruded front stays prevent flex in opening jambs.
- › One stop shop – we'll supply your door and your cavity slider no problem. And what's more, our paint quality doors come with a moisture resistant UV coating on both faces.
- › For full warranty, refer to hallmarkgroup.co.nz/warranty
- › For full install instructions, refer to hallmarkgroup.co.nz/cavity-sliders

CAVZERO™ system in full height door

CAVZERO™ system in standard height door

The Hallmark door division produces the most comprehensive range of doors on offer in the market, manufactured right here in New Zealand.

TRIM SIZES

Formula for trim sizes

- › Height: Door height + 95mm
- › Single Width: Door width x 2 + 30mm
- › Double Width: Door width x 4 + 10mm
- › For all other sizes please call our friendly customer services team.
- › All standard units are for 90mm framing with one layer of 10mm gib each side for architraves.
- › For double grooved units, add a D/G to the code.
- › Please use order forms to ensure correct supply.
